Data Analyst with training in Information Systems Engineering and experience in business-oriented analytical environments. I perform data extraction, processing, and analysis tasks to generate reports, indicators, and dashboards that support decision-making. I have experience in SQL, report automation, and KPI visualization, collaborating with different teams to transform complex information into actionable insights.

EXPERIENCE

Individuals Analyst 1 - Portfolio Analytics

BBVA Argentina   *August 2025 - Present*

- Performed **data extraction and processing in SQL/Teradata**, ensuring reliable information to support **strategic decision-making**.
- Designed, maintained, and **optimized reports and key management indicators** to effectively track **business performance**.
- Analyzed data related to **product portfolios and commercial processes**, identifying opportunities for **improvement and efficiency**.
- Developed dashboards in **Strategy** to **monitor KPIs** related to **investments and loans**.
- Collaborated in the preparation of **periodic reports and executive presentations** for **senior management**.
- Partnered with product, strategy, and operational teams to identify **information needs and transform them into value-added analytical solutions**.

Administrative Management Analyst

Fondos Toty's SRL   *February 2024 – July 2025*

- Implemented a **centralized data management system (SQL relational database)** that **reduced time spent on administrative tasks by 40%.**
- Developed **interactive dashboards** in **Excel** for sales and inventory analysis, improving visibility of trends and consumption patterns.
- Automated the generation of monthly production and sales reports, **saving approximately 10 hours of manual labor per month**.
- Designed and launched a corporate **website** that **increased the company's online visibility by 65%.**
- Trained 6 employees in the use of new technological tools, **achieving 100% adoption in less than 2 months**.
